BENJAMÍN RUIZ ALMONACID

Software Engineer | Backend | Cloud | Applied AI

benjaruiz70@gmail.com · (+56) 9 7435 9532 · github.com/Wachitugo · Puerto Montt, Chile

PROFESSIONAL PROFILE

Software engineer specialized in backend, cloud and applied AI. I design and build multi-agent systems with RAG on Google Cloud (Vertex AI, Gemini, LangGraph) and Azure, from architecture through production deployment and monitoring. Experience delivering projects for large-scale mining (Codelco) and the education sector, leading technical teams, managing infrastructure as code (Terraform) and automating CI/CD pipelines.

PROFESSIONAL EXPERIENCE

AyP SPA | Backend, AI & Cloud Engineer — *2026 – Present*

Codelco project — Form platform for mining plants

- **Multi-agent systems with RAG:** Designed and built agents with Vertex AI Agent Builder and Gemini that generate and manage operational forms from the plants' technical documentation.
- **Backend:** Services and APIs on an event-driven architecture with Pub/Sub, Firestore persistence and analytical models in BigQuery ML.
- **Cloud infrastructure:** Deployment and operation on Google Cloud with infrastructure as code and CI/CD pipelines.

Digital Class Book — School management platform

- **Backend & infrastructure:** Built the backend and cloud infrastructure of a digital class book, including its finance module.
- **Client discovery:** Defined scope and requirements directly with the school.

Convivencia Inteligente | Backend & DevOps Engineer — *2025 – Present*

Multi-school SaaS platform for managing school coexistence regulations.

- **Backend & AI:** Backend logic for a multi-tenant platform with Vertex AI and Gemini agents that automate regulation management.
- **Cloud migration:** Migrated services from Azure to Google Cloud, with containers on Cloud Run and infrastructure as code in Terraform.
- **CI/CD & monitoring:** Cloud Build pipelines, automated testing, proactive monitoring and real-time error reporting.

Krino Insight | Tech Lead & Cloud Architect — *2025*

AI agent system for assisted academic grading.

- **Leadership:** Led a technical team through the full product lifecycle, from definition to deployment.
- **Backend & architecture:** API design, database administration and cloud architecture on Microsoft Azure.
- **Optimization:** AI model integration, SQL query optimization and system performance dashboards.

EDUCATION

Bachelor's Degree in Computer Engineering — Instituto Profesional Duoc UC — *2022 – 2025*

Computer Programmer Analyst — Instituto Profesional Duoc UC — *2022 – 2024*

TECH STACK

AI & agents	Vertex AI Agent Builder, Gemini, LangGraph, RAG, multi-agent systems, BigQuery ML
Languages	Python, Java, JavaScript / TypeScript
Frameworks	Django, Kedro, LangGraph
Cloud	Google Cloud (Cloud Run, Pub/Sub, Firestore, BigQuery), Microsoft Azure
DevOps & IaC	Terraform, Docker, GitHub Actions, Azure DevOps, Cloud Build
Databases	PostgreSQL, MySQL, SQL Server, Oracle, Firestore
Operating systems	Ubuntu / Linux, Windows

SKILLS

Technical leadership and team management · Client requirements gathering · Data analysis · Complex problem solving · Effective communication · Continuous learning

LANGUAGES

Spanish — Native
English — Intermediate (technical reading)
